

Retrospective Report

Team Name: Super-Ninja

Team ID: TA342

Date: 18 September 2018

<p>What went well in the last delivery cycle?</p> <p>The delivery went well with impressive comments from Yi Wei:</p> <ul style="list-style-type: none">• The layout has been improved drastically and the website is more appealing.• The website did not crash at any stage.• The pages were loaded correctly with the required content and the pictures did outline the focus of our aim.• The calendar was helpful to make the user understand nearby places to go for activities.• A information page which is about diseases of over sugar intake is add on the website and this page can help users know more about risks of sugar.	<p>What went badly in the delivery cycle?</p> <ul style="list-style-type: none">• The website needed more direction to let the user know about the rest of the content of the page.• There were few grammatical mistakes and information do not directly link the content to the project.• Few headings had some colour changes when hover on top of it but is not clickable which defeat its purpose however there we clickable content without indication.• On the result page of the calculator, the background is not related to the website and some pages needed to readjust.• The font on the sugar calculation page was not consistent.• The result page after sugar calculating looks like a different website, and the font of the result page as well as its UI design is not good.
<p>What have we learnt in the delivery cycle?</p> <p>After receiving the feedback from YiWei, we get useful information:</p> <ul style="list-style-type: none">• We should thoroughly test the website. This will throw light on things which needs to improve.• In addition, we show have taken screenshots of errors from an input and re-enter that after fixing the bugs to ensure the problem has been solved.• We also understood that being in the shoes of users will give us ideas on what those users will expect.	<p>What would we do to improve?</p> <p>There are many tasks we need to improve:</p> <ul style="list-style-type: none">• We should all do the testing together and redo the test once the bugs have been fixed.• We should also have more testers as this will give us more ideas and recommendation of what is expected.• We should also choose new testers when the website is ready as this will give another perspective of the website.
